

Contrasttech

LEO Series Large Area Scan Cameras

- Excellent cost performance ratio
- GigE / 10GigE / Camera Link / CoaXPress
- 0.8MP to 150MP
- Advanced I / O Control

LEO Series

Contrastech LEO Series

Large Area Scan Cameras

Brief Introduction

With the wide application and popularization of machine vision technology, more and more higher requirements proposed by industrial applications, like high precision measurements and high speed inspection. Depend on decade technology accumulation efforts from former cameras, Contrastech has developed a new series cameras - LEO Series which available in the market to answer different challenges.

LEO series camera covering a range of resolution from 0.8MP to 150MP, can meet various requirements of machine vision application.

LEO series cameras with various popular data interfaces. The GigE interface, its max transmission distance up to 100 meters; the 10GigE interface provide high frames rate acquisition of large resolution images; the Camera Link interface with mature and stable industrial image data interface which easy answer all kinds of harsh working environment; the CoaXPress interface combine with features of GigE interface and Camera Link interface. You can choose the right data interface flexibly according to your actual demands. The cameras also provide separate input/output

ports for triggering or flashing control.

LEO Series industrial cameras compatible with GigE, 10GigE, Camera Link and CoaXPress data bus standards, support GenICam, GigE Vision®, can smoothly connect with third-party software, like HALCON, Vision Pro etc., without secondary development. LEO Series cameras with excellent cost performance and fully suitable for various inspection, measurements and high-speed imaging applications. This series cameras won customers high praise because its perfect performance in cellphone and tablet PC screen inspection, LED automatic packing, defect inspection, electronic components manufacturing, wafer positioning and other applications. With this variety of sensors and interfaces, combined with the extensive features offered, LEO series is fit for a wide range of vision applications.

Applications

Cellphone Screen Inspection, Defect Inspection, SMT, Panel Inspection, Vision Location, Luminous Module Inspection, LED/LCWOLED, High Precision Dimension Measurement, Document Digitization, HSR Catenary System Inspection, Tunnel Wall Crack Inspection.

Main Feature

Wide Range of Resolution

Resolution from 0.8MP to 150MP for Various Applications.

High Quality Sensors

Latest Kodark, Onsemi Series Sensors
Sony Pregius Series Sensors

High Frame Rate, Up to 68fps

High Frame Rate Ideal for High-speed Application.

128 MB RAM

Internal memory up to 128 MB guarantees no image loss.

Excellent Cost Performance.

Contrasttech LEO Series

ABOUT US

Hangzhou Contrastech Co.,Ltd. is China top leading professional machine vision products manufacturer and supplier, who have been specializing in design, development and producing machine vision products, software and systems.

With advanced technology and creative power of image acquisition and processing, Contrastech major products have included industrial camera, scientific standard camera, industrial FA lens, telecentric lens, machine vision lights and image processing software. All products comply with international quality standards and we have more than 20 years industry experience in the fields of machine vision image acquisition and processing, optical imaging and automation.

Contrastech provides free of charge consultation for imaging solution. With excellent pre-sales, quality control and after-sales service team, we are able to respond rapidly in 24 hours and ensure to create best value for customers. Contrastech will innovate achievements together with our customers in the constantly and shall make more brilliant achievements.
